Lesson 6.06 · The Water Cycle: A Journey With No End

Level 6 reading lesson

Level 6

Name _____

Date _____

Thin sheet, on purpose. Level 6 lessons are reading-and-thinking lessons built on a long text, and the text is in the app. This sheet carries only the lesson's word list and writing task from the course data. Words here are not limited to taught sounds, because Level 1 to 4 already taught them all.
Goal: Read a sequence text about the water cycle, running the full reciprocal-teaching routine independently, and learn to unpack passive-voice sentences to find out who — or what — is really doing the action.

1 Words from this lesson

read each word, say what it means

evaporate
to change from a liquid into a gas, usually because of heat

condense
to change from a gas back into a liquid, usually because of cooling

2 Write

In 3–4 sentences, summarize the water cycle in your own words, using at least two sequence signal words (first, next, then, after, finally, meanwhile).

GROWN-UP TIP Read the words together, then ask what each one means. Let your learner write in their own words. Do not rush: a few good sentences beat a full page. Five minutes is plenty: stop while it is still fun. Cheer for trying, not just for being right.

My progress ☐ I read the words ☐ I can say what they mean ☐ I wrote my sentence

Days I practised: ◯ ◯ ◯ ◯ ◯

Words come straight from the course lesson file. Not checked for sound-by-sound decodability: Levels 5-7 read whole words and word parts.
