

SOUND OUT · PRACTICE SHEET

Lesson 7.04 · Reading a Science Article I: Claim, Method, Sample Size

Level 7 reading lesson

Level 7

Name _____

Date _____

Thin sheet, on purpose. Level 7 lessons are reading-and-thinking lessons built on a long text, and the text is in the app. This sheet carries only the lesson's word list and writing task from the course data. Words here are not limited to taught sounds, because Level 1 to 4 already taught them all.
Goal: Learn to pull apart a science write-up into its actual claim, the method used to test it, and the sample size — and notice when a headline overstates what the study behind it found.

1 Words from this lesson

read each word, say what it means

Methodology
the specific method a study used: who/what was tested, how, for how lo

Sample size
how many people, animals, or items were actually studied. A small samp

Peer review
before serious scientific journals publish a study, other scientists i

deposition

primary source

corroborate

2 Write

Write a paragraph (5–7 sentences) rewriting the headline and the first sentence of the article so they accurately reflect the study's actual size and method — without pretending the finding is meaningless. Use methodology and sample size correctly at least once each.

GROWN-UP TIP Read the words together, then ask what each one means. Let your learner write in their own words. Do not rush: a few good sentences beat a full page. Five minutes is plenty: stop while it is still fun. Cheer for trying, not just for being right.

My progress ☐ I read the words ☐ I can say what they mean ☐ I wrote my sentence

Days I practised: ◯ ◯ ◯ ◯ ◯
