Lesson 7.07 · Argument Evaluation: Logical Fallacies & Evidence Strength

Level 7 reading lesson

Level 7

Name _____

Date _____

Thin sheet, on purpose. Level 7 lessons are reading-and-thinking lessons built on a long text, and the text is in the app. This sheet carries only the lesson's word list and writing task from the course data. Words here are not limited to taught sounds, because Level 1 to 4 already taught them all.
Goal: Name six common logical fallacies and spot them in a real-feeling argument; rank evidence from strong to weak inside one essay.

1 Words from this lesson

read each word, say what it means

Straw man

misrepresenting an opponent's argument as weaker or more extreme than

Ad hominem

attacking the person making an argument instead of the argument itself

False dilemma

presenting only two options when more exist

Slippery slope

claiming one step will inevitably lead to an extreme, unlikely chain o

Appeal to popularity (bandwagon)

claiming something is true or right because many people believe it

Appeal to authority (misused)

citing an authority who is not actually an expert on the specific clai

2 Write

Write a paragraph (6–8 sentences) naming three fallacies you found (name the fallacy + quote it), then state, separately, what a genuinely strong version of this argument would need (e.g., actual outcome data — test scores, graduation rates — from real four-day districts compared

GROWN-UP TIP Read the words together, then ask what each one means. Let your learner write in their own words. Do not rush: a few good sentences beat a full page. Five minutes is plenty: stop while it is still fun. Cheer for trying, not just for being right.

My progress ☐ I read the words ☐ I can say what they mean ☐ I wrote my sentence

Days I practised: ◯ ◯ ◯ ◯ ◯

Words come straight from the course lesson file. Not checked for sound-by-sound decodability: Levels 5-7 read whole words and word parts.
